A 14/8/67

Extract of letter o Mis 236 dated 11th May 1937 from the Municipal Engineer, Bangalore City to the Municipal Commissioner, Bangalore City

---

I have the honour to submit herewith the estimate amounting to Rs 1,68,058/- for tarring roads in the City The estimate is divided into three parts

1 First or the roads that have been recently formed and surface of which is generally fair, it is proposed only to patch repair the ruts and pits with premixed stuff and finally coat with a paint coat of - emulsion or Spramax for a patch repairs A sum of s 100/- a furlong is provided as per data All these roads require edging Road lergth treated as above will be 55 Furlongs

2 Secondly, the roads which are in disrepair are proposed to be picked and reformed with two inches thick metal and consolidated, and it is proposed to have the paint coat with emulsion or Spramax The length treated as above is 88 Furlongs

3 Items 2 and 3 include only roads where the buses ply But the roads in the III Division from City Railway Station to Sharagupet, etc , carry heavily loaded Bullock carts and Lorries This requires special treatment to withstand this mixed heavy traffic The concrete is the best for this, but it is certainly prohibitively costl ext best is shellcrete and this is largely used in the Municipality of Mill Town of Ahamadabad and other places where there is mixed heavy traffic Burmah-Shell Co , was asked to examine and quote the rates for this work The letter received from them with their estimate is enclosed in - original The two raods, Gundopanth Street and Kasivisweswara temple Street are included as the same mixed heavy traffic passes on them This length will be about 20 Furlongs
